ABOUT ME

Final-year BS Software Engineering student at UMT with 8 months of internship experience in full-stack development. Specialized in **MERN** and **Django** stacks, building secure, scalable web apps with **AI** integration (RAG/LangChain).

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3.

Frontend: React.js, Next.js, Tailwind CSS, Daisy Ui, Redux Toolkit, Bootstrap.

Backend: Node.js, Express.js, Django (DRF), REST APIs.

Databases: MongoDB, MySQL, SQL Server, PostgreSQL, Chroma DB

AI & Automation: RAG, LangChain, ollama, Chroma DB, Numpy, Pandas, Scikit learn, n8n, webhooks

Tools: Git & GitHub, VS Code, PyCharm, Postman, Linux, WordPress, Google Colab, Firebase

EDUCATION

➤ BS Software Engineering

- **University of Management and Technology (UMT)** | 8th Semester (Graduating July 2026)
- **CGPA:** 3.27

PROFESSIONAL EXPERIENCE

Gyrate Digital

Software Engineering Intern | July 2025 – Oct 2025 | 3 Months

- Developed and deployed an E-commerce platform using **Next.js**, **TypeScript**, and **Firebase**.
- Optimized frontend and implemented secure user authentication and real-time data fetching.

BolTech Solutions

Web Developer Intern | July 2024 – Oct 2024 | 3 Months

- Developed full-featured React applications using **Redux Toolkit**, **React Router**, and **Axios**.
- Implemented secure **JWT Authentication** and complex form handling logic.

IREG-IT

Web Developer Intern | Sep 2023 – Nov 2023 | 2 Months

- Configured VPS servers, migrating 10+ websites from shared hosting to VPS, achieving 99% uptime.
- Developed and deployed WordPress sites, DNS management serving 1,000+ monthly visitors

PROJECTS

Local Rag Assistant (Rag and LangChain): [GitHub](#)

- Created a Local RAG Pipeline using **LangChain** and **Ollama**, processing queries with 95% accuracy.
- Optimized a FAISS Vector Store with 1024-dim embedding for high-speed semantic search.

Ecommerce Website: (React + Firebase): [Live](#)

- Features like Add to Cart, Checkout, Login, fetching real-time data for an admin panel using Firebase.
- Products and checkout details on Admin Panel optimizing with 20% faster load times via lazy loading.

Student Management System: (MERN Stack): [Live](#)

- Developed secure CRUD operations with encrypted authentication, managing attendance for 100+ users.
- Mark and view student attendance with respect to dates.

GitHub Repository and User Finder (NEXT Js): [Live](#)

- Architected an open-source tool using GitHub API for profile exploration used by 200+ developers.
- Explore user followers, following and repositories.

Twitter like platform (Django): [Live](#)

- Built a twitter clone app with CRUD, image uploading, and secure auth (password checks, protected routes).
- User based tweet management each user can edit/delete his/her own tweet only.
